

# IMPORTANT INFORMATION ON CORONAVIRUS

While there is no documented risk of COVID-19 (novel coronavirus) transmission through blood, in an abundance of safety, we are recommending a **voluntary self-deferral** for certain donors.

Please do not donate blood if in the past 14 days:

1. You have been diagnosed with COVID-19.
2. You have been tested for COVID-19 (via diagnostic test) and have not yet received test results (regardless of the reason for being tested).
3. You have lived with, had close contact with, or provided care to an individual diagnosed with COVID-19, outside of a health care setting where infection control practices were employed.
