

Instructions to Set Up Donor Account

If you haven't set up a donor account on kybloodcenter.org, follow these instructions.

1. Go to www.kybloodcenter.org.
2. Click "Menu" in the top right corner.
3. Click "Donor Login."
4. Beneath the red login button, click the link "Don't have an account? [Create One Now.](#)"
5. Fill out the form completely using the name and contact information given at registration. **Note:** Donors are emailed with their Donor ID 48-72 hours after donation. You can also create your account without your donor ID, but your health screening and test results will not be available.

Instructions to Link an Existing Account to Your Donor ID

If you created an account before you had a donor ID, you can link your account once you receive your donor ID via email. Click "Wellness Center." Locate your donor ID in your email and input the 6-digit donor ID in the box.

Instructions to Locate COVID-19 Test Results

COVID-19 antibody test results are **only** available through the donor portal on a desktop computer.

1. Log in to your donor portal. See instructions above if you need help creating an account.
2. Click "Wellness Center."
3. You will see tabs for blood pressure, pulse, hemoglobin, etc. You will also see a tab that says "COVID Antibodies." Click this tab to view your results.

Please note: COVID-19 Antibody test results will not appear in the portal for 7-10 days after donation. Other test results may appear sooner.

For help with your account, email info@kybloodcenter.org or call 800.775.2522. Scan this QR code for step-by-step video instructions on creating an account:

For questions about your COVID-19 Antibody test, please consult your physician.
